

ABOUT JAN

Jan Rudolph worked for 29 years in film and television production, thriving in a key crew position that highlighted her Virgo attributes. After realizing that her job, with a little help from Pluto, could literally kill her, she made a dramatic exit and turned her professional focus to her lifelong study of Astrology and its practical application in life.

Now an Astrological Humorist and Non-Fiction Storyteller, Jan shares her cosmic insight with a passion for demystifying the stars. She brings astrology down to earth, one "aha" moment at a time.

She sees her own chart as a fascinating mix of astrological contradictions in motion. She also has ethical concerns about the limitations of cookie-cutter astrology.

Jan embraces the infinite journey of astrological study, fully aware that the path is unending. As an enthusiast of the celestial, she delights in provoking audience members to expand their perspectives on how they can best express their unique astrological blueprint, while having fun.
